Industry newcomers at EUROGUSS 2020

The “Innovation made in Germany” pavilion will feature at EUROGUSS for the first time in 2020. The pavilion gives young, innovative companies from throughout Germany an opportunity to participate in the trade fair, and is sponsored by the Federal Ministry for Economic Affairs and Energy (BMWi). Great news is that the pavilion is already fully booked for its first appearance. A total of eight companies will be exhibiting at the pavilion from 14 to 16 January 2020.

EUROGUSS is the meeting place for the die-casting industry. It is where all the key players gather, providing the ideal opportunity to engage in dialogue and make international contacts.

Start-ups and new manufacturing firms from throughout Germany will be the focus of the “Innovation made in Germany” pavilion in Hall 7, where they will present their innovative products and services to the international trade visitors attending EUROGUSS and offer new stimuli for the die-casting industry.

These new companies represent a broad range of products and services, covering themes such as automation, bionic engineering, innovative cores and heat-insulated furnaces.

The companies presenting at the pavilion are:

- ALU PROCESS
- CellCore 3D
- Combicore GmbH
- deevio GmbH
- FMT futuremetals Technologies GmbH
- G-S-D Maschinenbau GmbH & Co. KG Gerhard Schoch
- Knowhow Wilhelms GmbH
- SP Süddeutsche Prüfanlagen GmbH
