& Security

PRESS RELEASE

September 2021

Get your ticket for Perimeter Protection today

- Optimism and anticipation at all-time high
- Visitors can book their tickets now
- New additions to supporting programme complement exhibition

From 18 to 20 January 2022, international experts in perimeter protection, fencing technology and building security will gather for what will already be the seventh round of Perimeter Protection in Nuremberg. Expanding into two halls, the exhibition will present the latest trends in fences and fencing systems, electronic alarm systems, and drone detection and defence.

Frank Venjakob, Exhibition Director Perimeter Protection, is satisfied with the number of registrations and feedback from exhibitors so far: "Despite the ongoing pandemic, there is immense anticipation and optimism about the trade fair. Our exhibitors are still very keen to meet and interact face-to-face." The event is being planned in line with the safety and hygiene regulations currently in force.

For regular updates on the measures that apply, please go to:

Expert forum with high-calibre presentations

The accompanying forum, at which high-calibre speakers will present practical solutions, offers participants plenty of opportunities for professional knowledge-sharing and discussions with experts over the three days of the event.

The forum is being organised in partnership with the VfS (German Association for Security Technology), UAV Dach (German-speaking Association for Unmanned Aircraft) and CURPAS (Civil Use of Remotely Piloted Aircraft Systems) and is an ideal complement to the exhibition.

The following forum highlights have already been confirmed:

- The smart gate as part of your security concept
- The latest on the standards for doors and gates; status and outlook
- Drones: improve your security concept with dynamic systems
- Drone detection: key outcomes from a field test

Perimeter Protection on social media

If you want to stay up to date before, during and after the trade fair and network with the NürnbergMesse team you'll find the event on social media:

#perimeterprotection

Greater reach for drone technology

The integration of U.T.SEC@Perimeter Protection as a new platform within Perimeter Protection serves as an extension of the established special display area for drone detection and neutralisation. It covers the various technical, legal and practical aspects of detecting, using and neutralising drones and other unmanned technologies.

Interested visitors can book their tickets now:
