## PRESS RELEASE

November 2022

### Exhibition breaks all records in 2023

- Great pleasure in renewing contact after three-year interval
- Exhibitor numbers and sold exhibition space higher than ever
- Subject-specific component with wide range of formats

The provisional numbers show Perimeter Protection has broken its own record once again: 180 exhibitors have registered so far for the event in January. The sector has had to wait three whole years, resulting in huge anticipation for the forthcoming show. The International Exhibition for Perimeter Protection, Fencing and Building Security will take place in the exhibition halls in Nuremberg from 17 to 19 January 2023. One thing is already clear: There will be highlights en masse.

Further, higher, faster: Perimeter Protection has followed a continuous pattern of growth since its launch in 2010. Whereas it began with 45 exhibitors in its first year, it has now achieved a record with two months still to go before the 2023 exhibition starts: “One hundred and eighty exhibiting companies clearly show how pleased everyone is to renew contact again after a three-year break,” says Hanna Schneider, Manager Perimeter Protection. “We are genuinely overwhelmed – after last year’s exhibition had to be postponed, more companies than ever have registered this time. The entire PP team is very happy to be able to hold the event again at last.” The event had to be deferred for a year because of the pandemic, and will be held at two-year intervals starting next year.

NÜRNBERG MESSE

International Exhibition for Perimeter Protection, Fencing and Building Security  
Internationale Fachmesse für Perimeter-Schutz, Zauntechnik und Gebäudesicherheit

The exhibition area is also larger than ever before, at just under 7,300 square metres, with international firms accounting for about 2,900 of that total. The total exhibition area for the event is therefore almost 1,000 square metres larger than in 2020. The international exhibition area has increased by about 800 square metres. “It is clear that moving Perimeter Protection to the new Halls 1 and 2 was an important step,” observes Frank Venjakob, Director Exhibition Perimeter Protection. “These locations enable us to meet the exhibitors’ demands for plenty of space with no issues. We are particularly pleased to see 65 new exhibitors, who will make an excellent addition to the range of the exhibition with their new themes and products.” Bavarian MP Joachim Herrmann will act as patron of the exhibition, as in previous years, and will also attend for a personal tour on-site.

### **More professional interaction than ever**

This year, the exhibitor and product platform offers an extensive overview that illustrates the range of highlights to be seen on-site. That gives both exhibitors and visitors the best opportunity to prepare in the lead-up to their participation, whether by arranging an appointment directly with the exhibitors, or by putting together and saving a visit list. The special U.T.SEC exhibition area, measuring more than 200 square metres, will impress not only with its own stand structure, but also because that is where visitors will discover all kinds of information on the technical, legal and practical opportunities available for the use of drones and other unmanned technologies, and for defence against such systems.

### **Information to the power of three**

The latest developments, industry tips and, in particular, professional interaction are also on offer at the Nuremberg Security Conference in addition to the Exhibition itself. The all-day Conference will take place in the Brussels Room on 17 January. The programme and tickets can be found at [www.nuernberger-sicherheitskonferenz.de](http://www.nuernberger-sicherheitskonferenz.de), and may also be obtained at the venue. Tickets for the Nuremberg Security Conference include attendance at the Perimeter Protection exhibition.

The German Commission for Electrical, Electronic & Information Technologies (DKE) will hold its meeting at the exhibition and will discuss and vote on a new standard.

The Bavarian Chamber of Civil Engineers will once again hold its regional gathering in parallel with the exhibition in 2023. That will enable participants to make the best use of the synergies there and benefit from direct professional interaction. Communicating, discussing and conversing – face to face. Following this lengthy interval, the focus will once again be on personal contact and direct interaction within the industry.
