Held between 13 – 16 March 2019, the 4-day exhibition provided participants with insights into the latest trends and innovations in furniture production, woodworking machinery, interior design services, diverse building engineering services and the ever-growing woodworking industry.

DELHIWOOD 2019 India today has established itself as the most important event of the entire Indian Woodworking industry along with INDIAWOOD & MUMBAIWOOD, having consistently offered an all-encompassing platform for both the demand and supply side to equip themselves with latest in technology, design, machinery and raw materials.

The theme of this edition was 'Transformation of Furniture Manufacturing and the Woodworking Industry' aptly carried forward to encourage domestic manufacturing for production and supply of equipment.
