2022 is the European Year of Greener Cities

The key theme of the World Urban Parks Europe Congress is tailored to the “European Year of Greener Cities 2022” sponsored by the EU. The aim of this year’s action is to make urban environments greener and to increase awareness of the benefits of green spaces in an urban environment – for example, environmental benefits as well as benefits linked to health, culture and education. The European Year of Greener Cities will also explicitly focus on topics like green infrastructure and greener public procurement.

Working together for a climate-friendly future ...

... is the key theme of GaLaBau 2022. Climate change is the biggest global challenge of our time and the “green sector” is actively helping to mitigate it in many areas of gardening and landscaping. GaLaBau 2022 will showcase innovations, trends and products that have a positive impact on climate change. The booths of participating exhibitors and all the relevant points of the supporting programme will bear the GREEN-BLUE PATH symbol, which will serve as a visual navigation tool for visitors. The World Urban Parks Europe Congress is also part of the GREEN-BLUE PATH.
