Safe personal networking thanks to incidence-independent hygiene concept

NürnbergMesse has been working with the Bavarian regional government and Bavarian trade fair companies to develop a workable hygiene plan to allow FachPack to be visited safely. It is based on the incidence-independent framework hygiene concept for trade fairs and exhibitions currently in force in Bavaria. Specific measures to protect trade fair participants include regular air exchange and an ultra-modern ventilation concept, social distancing by means of space planning and capacity management, mask mandates indoors, on-site hygiene measures, and digital registration and access systems with associated contact tracing options.

**28.-30.9.2021
NÜRNBERG**

Another essential cornerstone is the “3G rule”, which restricts entry to visitors who are vaccinated, have recovered from an infection, or have returned a negative test result. For updated information on the hygiene concept and protective measures please go to: www.fachpack.de/protective-measures
