PRESS RELEASE

May 2022

Anticipation for Perimeter Protection 2023

- 90% of space booked already
- Rich programme
- Collaboration with Nuremberg Security Conference confirmed

Anticipation is already strong for the next Perimeter Protection, scheduled for 17-19 January 2023. In 2022 the decision was taken, on account of the pandemic, and in close consultation with exhibitors and partner entities Gütegemeinschaft Metallzauntechnik (Metal Fence Technology Association), Verband für Sicherheitstechnik (German Association for Security Technology, Vfs) and UAV DACH (German-speaking Association for Unmanned Aircraft), to defer Perimeter Protection for a year.

Plans are now in full swing for the event in January 2023, and 90 percent of the exhibition area is already booked.

“The mood in the sector is excellent,” says Hanna Schneider, Manager Perimeter Protection at NürnbergMesse. “Everyone is looking forward to Perimeter Protection in January 2023. It’s a pity we had to postpone the exhibition in 2022, but the anticipation and the focus on next January are so much greater now. We’re right in the middle of the planning process and are busy arranging the last stand areas. Currently we have almost 130 exhibitors, with a strong international contingent. In addition, nine exhibitors have already registered for the special U.T.SEC exhibition area.”

Trade visitors can look forward to an event that reflects the entire range of products and services for mechanical, electric and electronic security solutions. Rounding out the exhibition is the integration of the U.T.SEC platform, which focuses on the technical, legal and practical opportunities available for the use of drones and other unmanned technologies, and for defence against such systems.

Expert forum with high-calibre presentations

Perimeter Protection 2023 will once again offer an accompanying Trade Forum with high-calibre speakers, presenting practical solutions and offering participants plenty of opportunities for professional knowledge-sharing and discussions with experts for the three days of the event.

The themes of perimeter protection, fencing and building security and unmanned technologies are a firm part of the programme, which is being organized in partnership with the VfS (German Association for Security Technology), UAV DACH (German-speaking Association for Unmanned Aircraft) and CURPAS (Civil Use of Remotely Piloted Aircraft Systems). The presentations will focus on innovative approaches and novel solutions, and will tackle topics of current interest. The Trade Forum will also offer businesses and institutions an opportunity to present their subject-area expertise and products and services to the exhibition and lecture visitors.

The following forum highlights have already been confirmed:

- The smart gate as part of your security concept
- The latest on the standards for doors and gates; status and outlook
- Drones: Improve your security concept with dynamic systems
- Drone detection: Key outcomes from a field test

Because Perimeter Protection will move to the new Halls 1 and 2 in 2023, the supporting programme will also relocate to NCC Mitte.

For more information on the supporting programme, see the summary here:
perimeter-protection.d/specialist-forum

Collaboration once again with Nuremberg Security Conference

Perimeter Protection in 2023 will once again include collaboration with the Nuremberg Security Conference. This event, organized by the private security industry, is aimed at business operators and all others with an interest in the theme of security who would like to achieve something either privately or for the industry as a whole. Numerous presentations will cover security topics of current interest. A number of interesting exhibitors from the security sector will round out the event.
