

# FeuerTrutz 2019 Nürnberg, Germany 20.–21.2.2019

Internationale Fachmesse mit Kongress für vorbeugenden Brandschutz  
International Trade Fair with Congress for Preventive Fire Protection

PRESS RELEASE

November 2018

## FeuerTrutz 2019 offers diverse supporting and congress programme on preventive fire protection

- **FeuerTrutz set to be bigger and more international yet again in 2019**
- **Attractive supporting programme with wide range of information**
- **Fire protection congress delivers professional expertise on the theme “Fire protection objective: concepts and solutions for standard and special buildings”**

With an even higher number of exhibitors than the 287 companies that attended the last round, FeuerTrutz will once again turn Exhibition Centre Nuremberg into the No. 1 dialogue platform for the international fire protection sector from 20 to 21 February 2019. The highlights of the event include three compact seminars and the exhibitor forums in the two exhibition halls. The Training & Career pavilion, featuring 16 training and professional development providers, the live demonstrations at the Fire Protection EXPERIENCE and the Jobs Board are all excellent additional sources of information at the trade fair. The accompanying FeuerTrutz Fire Protection Congress takes a more in-depth look at the latest important aspects of passive, active and organisational fire protection. This is where delegates can learn from experts about topics such as “Concepts for Special Buildings”, “Identifying and Avoiding Liability Traps in Fire Protection” and “Inner City Densification and its Impact on Fire Protection”.

“FeuerTrutz is set to be even more diverse and international: already, more foreign exhibitors have registered for FeuerTrutz 2019 than for the last round – from Europe and the USA through to Hong Kong. This underscores the importance of the event as the leading dialogue platform for German and international fire protection experts,” explains Stefan Dittrich, Executive Director FeuerTrutz at NürnbergMesse.

International Trade Fair with Congress for Preventive Fire Protection

## Trade fair offers impressive supporting programme

The supporting programme for FeuerTrutz once again offers an extensive range of presentations, live demonstrations, event formats and networking opportunities. In two exhibitor forums, exhibitors from all segments of preventive fire protection provide information on trends, new products and related applications. The Fire Protection EXPERIENCE gives trade visitors the chance to see fire protection in action, while live presentations in the halls and several spectacular demonstrations outdoors convey fire protection know-how in realistic displays. Three compact seminars offer additional expertise. In the compact seminar “BRANDSCHUTZDIREKT Löschtechnik” on the first day of the fair, participants can learn all about active fire protection such as sprinklers and other extinguishing equipment. The “Fire Protection in Bavaria” seminar is devoted to changes in the Bavarian fire protection regulations and is designed for architects and agency representatives. At the “Building Services Fire Protection Forum”, planners and engineers can find out what’s new in buildings services and fire protection, for example on the topics of dust fires and explosions or smoke removal from buildings. An English-speaking workshop for international fire protection experts complements the range of supporting events and provides information on the principles of the German fire protection market.

## Training opportunities and jobs board for fire protection specialists

The Training & Career pavilion offers fire protection experts a dedicated area for professional development and careers. “With 16 training and professional development partners taking part, this pavilion will once again be a drawcard for fire protection experts and all those who want to gain a foothold in the sector,” says a delighted Stefan Dittrich. In addition to this, the jobs board will soon be advertising job vacancies online before the event and during the fair itself. For the first time at FeuerTrutz 2019, job seekers can also send a speculative application directly to exhibiting companies.

For more information on the compact seminars please go to:

## Fire Protection Congress delivers the latest know-how

Parallel to the trade fair, the Fire Protection Congress will again provide first-hand expertise. Speakers with a lot of practical experience will provide information on the theme “Fire Protection Objective: Concepts and Solutions for Standard and Special Buildings” in three congress streams on current challenges in fire protection planning, with a particular focus on special buildings. In the congress stream “Best Practice”, for example, discussions will centre on fire protection in respect of timber structures used in special buildings, for office and administration buildings or educational establishments. Other topics that will be explored by experts at the Fire Protection Congress include: What role does the second escape route play in current fire protection concepts? What are the new developments resulting from MLAR (Model Directive on Cable Systems), MIndBauRL (Model Directive on Structural Fire Protection in Industrial Buildings) or EltBauVO (Regulation on the Construction of Operating Rooms for Electrical Equipment)? The FeuerTrutz Fire Protection Congress therefore covers the wide range of legal and organisational aspects which fire protection planners have to take into account today.

## FeuerTrutz After Work Party at Max Morlock Stadium

Relaxed networking is the key for rounding off the first day of the fair at the FeuerTrutz After Work Party. It will be held in the nearby Max Morlock Stadium and offers the opportunity to talk to business partners, customers and colleagues while enjoying Franconian specialities and gin tasting.

For tickets and information about the FeuerTrutz After Work Party please go to:
