PRESS RELEASE

June 2021

European Heat Pump Summit 2021 is planned on site thanks to trade fair restart

The Bavarian state government has announced a further easing of Covid-19 restrictions, offering the trade fair industry a clear prospect of re-opening. Provided there is a sustained decline in infection rates, it will be possible for trade fair operations to resume by 1 September 2021 at the latest. This decision is a boost for the European Heat Pump Summit, which is being planned on site in Nuremberg on 26 and 27 October 2021 in line with its usual schedule in the year between the biennial Chillventa exhibition.

As a result of this decision by the Bavarian government, making business contacts face-to-face, watching interesting presentations live without a screen and viewing products and innovations at first hand will all be possible again in time for the European Heat Pump Summit 2021. It's an announcement that the international heat pump community has been longing for. Representatives of the industry will gather at Exhibition Centre Nuremberg for high-calibre professional knowledge-sharing on market developments, technology and application trends covering all aspects of heat pumps. At the accompanying foyer expo, participating companies can also present their latest products and innovations. Naturally, a comprehensive hygiene plan will ensure the safety of all participants at the venue.

The four main thematic streams at the European Heat Pump Summit 2021 are market trends, R&D, development of components, and heat pump applications. The Call for Presentations is already online: www.hp-summit.de/abstract

Interested visitors unable to travel to the venue will still have the option of following the presentations as a live stream.
