embedded world 2020 – Eyes on the Future

Embedded systems' development is advancing at a rapid pace. New areas keep getting discovered, new requirements come to the fore. To keep up and satisfy its role as globally leading fair for embedded systems, the embedded world Exhibition&Conference offers you the decisive advantage in information and know-how for your success. Combining a first-class trade fair with high-quality conferences and an innovative professional programme makes embedded world the place to be for the embedded community.

We significantly expanded the start-up Area as a meeting point for innovators and completed it with the new embedded vision Area. High quality expert panels for topics like embedded vision, AI or safety & security offer a chance for dialogue. Guided tours for different focus areas complement our offer for you. Use this opportunity to exchange knowledge with embedded system's market leaders at this unique event that unites almost the whole industry.
