SAFE. SAFER. PERIMETER PROTECTION.

Perimeter Protection is an event that is unrivalled in Europe, because it brings together in one place the solutions and expertise for tackling the latest issues affecting the **security of outdoor sites**. It thus shows the complex **interaction of mechanical, electrical and electronic components** necessary to ensure an optimum level of protection.

Perimeter Protection provides a **comprehensive market overview** of cutting-edge solutions. No other exhibition offers this kind of expertise in one place in such a compact format, providing you with practical support for real-life scenarios.

The highly topical issue of **drone detection and defence** is also a focus topic and an integral part of the programme. The accompanying **Specialist Forum** provides access to professional expertise and innovative approaches, while the **Jobs Board** offers new career prospects for interested visitors.

So don't miss out, register now:

SPECIALIST FORUM FOR PROFESSIONAL EXPERTISE AT FIRST HAND.

NEW

The new forum at Perimeter Protection 2020 is being staged in conjunction with the **Association for Security Technology (VfS)**, among others. This ensures that the presentations cover topical issues and put the spotlight on innovative approaches and new kinds of solutions.

As a visitor you can access the forum free of charge, and with no obligation on your part, to find out about the latest developments in perimeter protection, fencing technology and building security.

ALL GOOD THINGS COME FROM ABOVE?

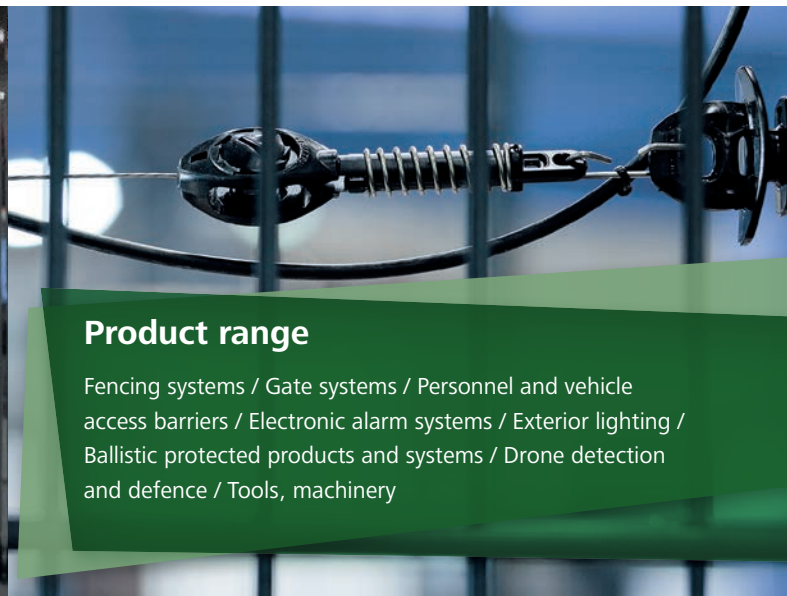

As the number of drones grows along with the possibilities they offer, monitoring and protection air space is becoming an increasingly important aspect of perimeter protection. How do you detect, identify and defend against unmanned flying objects? Perimeter Protection will also provide you with detailed information on this topic as part of the **focus topic drone detection and defence**.

Examples of presentations* from the programme

- Process optimization using perimeter systems
- Protecting access roads – effective management of complex requirements, more security through an integrative approach
- Innovations – in drones, detection systems, remote service and integrated security solutions
- Proper design of vehicular access management and vehicular access barriers.

*only held in german

Product range

Fencing systems / Gate systems / Personnel and vehicle access barriers / Electronic alarm systems / Exterior lighting / Ballistic protected products and systems / Drone detection and defence / Tools, machinery
