Enforce Tac has become established as a permanent fixture in the calendar of the global security community. The large number of international exhibitors and visitors reinforces its relevance as a platform for experts.

Especially in view of the increasing complexity of security scenarios, official security experts are attaching greater importance to having cutting-edge equipment such as ballistic protection, optics and optronics, sensors, CBRN detection and defence and modular add-on components. Thanks to its stringent admission criteria and discreet atmosphere, Enforce Tac is the ideal venue for presenting even sensitive topics and products.

The European Police Trainer Conference (EPTK), organised by PiD (Police Trainers in Germany), is held concurrently with the trade fair and attracts additional security specialists from all around the world to Nuremberg. Present yourself effectively to your target group by becoming an exhibitor now!

To book your exhibition stand go to:

WELL-DESIGNED VEHICLES
FOR SPECIAL OPERATIONS

At Enforce Tac there is a dedicated area for special-purpose vehicles. This is where security experts from official agencies inspect armoured ambulances, troop carriers, command and technical surveillance vehicles, so it's the ideal opportunity for you to make a huge impression with your product range.

U.T.SEC – SUMMIT FOR DRONES,
UNMANNED TECHNOLOGIES & SECURITY

U.T.SEC focuses on the technical, legal and, above all, practical aspects of using and combating drones and other unmanned technologies. Join in the discussion with representatives of official agencies, international security experts, decision-makers from government and experts from the research community – it's the ideal complement to the parallel event Enforce Tac! Representatives of security agencies (police, customs, border protection, military) and other government bodies and organisations with security responsibilities (e.g. fire service, German technical relief agency, other emergency services) and an exclusive group of security companies use U.T.SEC to discuss practical experiences, nurture contacts and add to their expertise.

The close proximity to Enforce Tac guarantees that U.T.SEC will attract the attention of 4,700 additional international trade visitors with a lot of interest in cutting-edge unmanned security solutions.
