

## Presentation of pets

---

These provisions are part of the Special Conditions for Participation (Item 19)

### Important provisions

#### 1. Application and approval

The exhibitor is obliged to apply for approval for the presentation of live animals. The application is to be submitted on the “Application” forms (available at [www.interzoo.com/en/exhibitors/exhibition-presentation/pet-presentation](http://www.interzoo.com/en/exhibitors/exhibition-presentation/pet-presentation) or via online Exhibitor Shop). The approval of applications for the presentation of pets is decided by the organizer.

The organizer may refuse to approve the presentation of pets for justifiable technical reasons. The exhibitor will be informed in writing if his application is refused.

The approval granted is valid only for the species, numbers of species and accommodations applied for.

The existence of approval for the presentation of pets and compliance with the requirements concerning such presentations (see instructions) will be checked at the exhibition stand by the veterinary authorities and the organizer.

**At the same time inspection will be made by the competent species conservation authority. The original documents or a species list with CITES import numbers of the protected species must be submitted to the authority during inspection.**

Please also observe the supplementary regulations for ornamental carp/koi (KHV infection) and birds (bird flu virus).

#### 2. Cancellation of approval / Exclusion of pet presentations

Pet presentations not applied for and approved presentations that do not meet the requirements may be prohibited during the exhibition. In such cases, the organizer may require the pets to be removed from the stand and accommodated at another place that meets the requirements at the exhibitor’s cost.

Many thanks for your attention.
