

## INFORMATION ABOUT APPLYING FOR A SHOOTING RANGE

### Dear exhibitor of IWA OutdoorClassics,

To set up a shooting range on your exhibition stand at IWA OutdoorClassics, a permit from the City of Nuremberg is required. There are important conditions for this permit that you must observe before you apply for a shooting range.

- ▶ All kinds of range – ranges for shooting with licensed firearms as well as ranges for shooting with air guns, spring-operated guns, CO2 guns and **all** airsoft versions – also require official approval by the Nuremberg authorities (shooting license). The granting of such a license is also dependent on the results of the safety inspection carried out by the official shooting range expert.

To this effect, the intended operation of a shooting range – regardless of type – must **be notified in writing** to the exhibition management with the application to exhibit **with the provided form**.

- ▶ The exhibition management will initiate the application for an official shooting license if necessary.
- ▶ On real shooting ranges and on laser and other virtual shooting ranges involving no projectiles moving in the direction of the target, people or similar are **never to be used** to represent targets on static target discs or videos, animated films or cartoons. Police or military training videos may only be shown to persons (representatives of official agencies) in closed-off areas of the stand.

To apply for a shooting range permit, the following documents must also be submitted:

- ▶ Proof of sufficient insurance coverage. This includes liability insurance with coverage amounts of at least 1,000,000 Euro lump sum for personal injury and property damage as well as accident insurance with coverage amounts of at least 10,000 Euro for death and 100,000 Euro for disability.
- ▶ Floor plan of the shooting range with safety measures.
- ▶ List of all weapons used including proof (in the form of pictures, web links, etc.).
