LIVE & PERSONAL

Who actually takes care of security when everyone is working remotely from home? In these challenging times, our world has become more digital, and IT security is more important than ever. It's now even more valuable to be at the cutting edge of technology, to know about the latest trends and to engage in professional dialogue. The best way to do this is face to face, at it-sa. The good news is that the Home of IT Security will be back for you again as a live event in 2021.

Look forward to real conversations and showcase your solutions to the digital challenges in the new normal. Your customers can't wait to see you at your exhibition stand at it-sa 2021!
