

EUROGUSS 2021

MEXICO

Important onboarding and technical requirements for talque:

- Please register using the email address to which this email was sent. Keep in mind that if you register with an external login (for example, via LinkedIn, Microsoft, Google, or Facebook account), the associated (private, if applicable) email address will be used.
- Take some time to answer the onboarding questions accurately and purposefully. The more precise your entries, the more precisely your Best Matches will be displayed.
- Your entries in the onboarding process can be adjusted at any time. To do so, please click on "Edit Profile" on your personal participant profile at the top right of the screen. After changing your details, your Best Matches will be recalculated.
- Please note that you only need to select a company in Onboarding on the second page "Are you an employee of a partner company?" if you are attending the event as an exhibitor and would like to appear as a contact person in your exhibitor profile. In all other cases, please select "No, does not apply to me".

An overview of the technical requirements (firewall settings) for optimal use of the platform can be found [here](#). In order to be able to make video calls during the event, please check with your IT department if necessary (if you are participating from a company network) whether the communication tool Jitsi used by the platform is approved for your firewall. The tool can be tested in advance [here](#)
