NEW THEME FOR FACHPACK 2022 >

FACHPACK is one of the most important guides for the packaging industry. The new trade fair theme is therefore devoted to the many trends affecting the packaging industry, like the demands for more sustainability, digitalisation, and e-commerce. Moreover, the Covid-19 pandemic has put the spotlight on product protection and has resulted in even greater growth in online shopping and home deliveries. All these issues represent a significant challenge for the packaging industry while offering even greater potential for growth.
